

ENECON[®] Solves Multiple Maintenance Issues at Houston, TX, Office Building - Providing Many Years of Trouble-Free Performance

ENECRETE WP was used to stop water penetration through the cracks in the concrete due to hydrostatic pressure. This application was carried out in 2012.

This ENECLAD FPS floor protection project has been performing beautifully since 2010.

ENECLAD FPS was also used to protect these loading docks since 2010.

Howard Kotler, ENECON's Regional Sales Director for the Gulf Coast, with the building's manager.

Mineral scale build-up was a serious problem especially in the cooling towers.

ENEFLOW is helping to control the scale problems.
