

Still Looking Great After 5 Years...

After 5 years since initial protection with *ENESEAL CR*, these rooftop air handler fans, pads and ductwork continue to be protected from environmental corrosion.

ENECON[®] NEWS

Pharmaceutical Company Uses ENESEAL CR to Protect Rooftop Air Handler Fans & Ductwork

Client: Pharmaceutical Company

Location: Eastern U.S.

Problem: Environmental corrosion was causing severe rust conditions on the fans, pads and ductwork.

Solution: Not only did the building engineers want to stop the rust but they also required a uniform, medium gloss, brush/roller mark-free finish. ENESEAL CR was chosen to satisfy all of the above criteria.

This work was done over the course of 5 months and the engineers we so pleased with the results it has lead to many other applications at the facility.
