

Faced With Severe Abrasion Problems, Australian Industries Turn To CeramAlloy CBX For Help

Matt Kenna, the President of Specialized Industrial Maintenance, the exclusive ENECON Distributor for Australia, has been working overtime to

keep up with the demand for ENECON's newest addition to the METALCLAD family of products, CeramAlloy CBX.

Designed for some of the

toughest abrasion applications, CeramAlloy CBX utilizes a unique blend of high performance polymers, multiple sizes of ceramic spheres and silicon carbide aggregates. The result is an

extraordinary polymer composite that is outperforming anything else on the world market.

Here are just a few recent examples of CBX successes in Australia...
